

## To each visitor to our Centre

All of us expect you to co-operate with us to prevent Corona-virus infection from spreading :

- Having cold-like symptoms
- Fevering higher than 37.5 degrees Centigrade
- Having general malaise intolerable
- Having shortness of breath
- Feeling abnormal in gustation or olfaction
- Having visited within 14 days areas near to where new Corona infection has spread
- Having contacted with a patient suffering from new Corona virus infection or suspected to have such a disease  
within 14 days (= evaluated as a suspect due to a closer contact )

We here at the entrance are on guard for all visitors with more than one answer positive in the cheque-up above.

Please stay co-operative & courteous towards working with us who are going to measure your temperature as well as to ask you a set of easy questionnaires at each visit in letting us understood in preventing each from any infection.

- We have restricted your care-takers to one person in number for the time present.
